

SOLAR READY STANDING SEAM JA-1.5ME and JA-2.0ME Profiles

- The JA-1.5ME & the JA-2.0ME are Solar Ready roofing systems.
- Solar panels can be installed on Southern and/or Western facing roofs only---do not need to put on entire roof for benefits.
- Properly installed Solar Panels on Metal Roofing offers lifetime longevity
- Insurance companies may offer discounts to homes with metal roofs.
- You may even qualify for tax credits by installing a Metal Roof and Solar Panels on your primary home.
- Metal Roofs are so energy efficient they can save you money in monthly heating and cooling costs.
- Metal Roofs for Solar Panels are considered a more sustainable choice than asphalt shingles because they're largely made of recycled material and can be recycled again and again.

More advantages of Metal Roofing for Solar Panels:

- Metal Roofing will last a lifetime where asphalt shingles would need to be replaced every 15 years.
- Combination of Metal Roofs and Solar Panels can enable you to attain higher levels of energy efficiency and the attendant cost saving
- Metal roofs perform well in high winds

In Summary, Metal Roofing for Solar Panels:

- **Durability**
- **Energy Efficiency**
- **Sustainability**
- **Fire, Water & Hail Resistant**

Testing:

In accordance with:

- UL 580 Wind Uplift (Class 90)
- TAS 125 Wind Uplift
- UL 1897 Extended Phase Wind Uplift
- UL 2218 Class 4 Hail Impact
- UL 790 Class A Fire Rating
- UL Environmental – SRI Third Party Verified
- ASTM E1646 Water Infiltration
- TAS 100 Wind Driven Rain
- ASTM E1680 Air Infiltration
- ASTM E1886 Missile Impact
- ASTM 2140 Static Pressure Water Head
- Miami-Dade County Approved
- Florida Building Code Approved
- Texas Department of Insurance Approval
